¿Por qué caen a Solana? Si tienes Solana tienes que salirte de ahí inmediatamente Te explico por qué No solamente FTX a través de Alameda Research era uno de los mayores inversionistas de Solana, sino que todo este pánico del mercado ha provocado que la gente saque su Solana del staking y en algunas horas mil millones de Solana van a ser liberados al mercado Toda esta gente sacando su Sol de staking representa aproximadamente 13% del total del supply circulante Probablemente le están sacando de staking para vender Sin mencionar que si a Alameda se declara en quiebra, las autoridades van a liquidar o sea a vender los activos que tenga, en este caso el Solana que tenga Todo eso es una presión de compra brutal para Solana, la cual ya ha caído mucho Creo que podríamos llegar a verla en 2 o 3 dólares Cuiden su capital, en mi opinión el fondo está cerca, pero no estamos todavía ahí. 0 <https://www.tiktok.com/@omarguerrero.pro/video/7164247562122235141> What did Alameda Research do? Alameda Research is a quantitative cryptocurrency trading firm that uses

proprietary algorithms to make trades across various exchanges. They are known for their active participation in the cryptocurrency markets and for providing liquidity to various trading pairs.
